## PROJECTS

### Project 1

#### Weather Forecasting application

- A Weather Forecast Application is a web-based platform that provides users with real-time weather information for any City. By integrating with external weather APIs, such as OpenWeatherMap, the app fetches and displays current conditions, including temperature, humidity, wind speed, and a brief description of the weather. Users can easily search for weather updates in different cities and stay informed about climate conditions.

### Project 2

#### Calculator

- It is an simple calculator using Angular

### Project 3

#### PaymentGateway application

- It is a whitelabel payment gateway offers a powerful and customisable solution for businesses to integrate payment processing, enhancing scalability, security, and user experience while minimizing reliance on third-party platforms. It is angular and springboot project

### Project 4

#### Smart contact manager

- It is a contact manager application .Used technologies are spring-boot, Mysql database, tailwindcss, java email services

## LANGUAGES

English

Hindi

## MY LIFE PHILOSOPHY

*"Stay curious, live authentically, and strive to balance passion with purpose."*

## MOST PROUD OF

### Fantastic Achievement

Participated in hackathon

### Another achievement

student of symbiosis digital academy

### Another achievement

2nd runner up in tug of war

## STRENGTHS

Hard-working

Eye for detail

Motivator & Leader
