SUMMARY

Final-year Computer Science student with strong full-stack development skills in Java, Spring Boot, React, MySQL, and DSA. Experienced in building scalable web applications with a passion for innovation and problem-solving.

PROJECTS

Weather Forecast Application

Symbiosis Skills and Professional University · github.com/shamita123d/WeatheForcastApplication
· **Designed and developed** a web-based Weather Forecast Application to deliver real-time weather updates for any city using external APIs.
· **Integrated** OpenWeatherMap API to **retrieve and display** temperature, humidity, wind speed, and detailed weather descriptions.
· **Implemented** a user-friendly search functionality, enabling users to **access weather updates** for multiple cities seamlessly.
· **Technologies Used**: MySQL, Spring Boot, Hibernate, HTML, CSS, Bootstrap, JavaScript, API.

Swiftpay [Payment Gateway Application]

Full Stack Java Development Course
· This **Angular** and **Spring Boot**-based white-label payment gateway offers a **customizable** and **scalable** solution for businesses to integrate payment processing, enhancing **security**, **performance**, and **user experience** while minimizing reliance on third-party platforms.
· **Developed** a robust backend using **Spring Boot**, facilitating seamless integration with multiple payment methods.
· **Technologies Used**: Angular, Spring Boot, Spring Security, MySQL, JWT, Tailwind CSS, Maven.

Smart Contact Manager

PJLCE · github.com/shamita123d/memora
· Developed a secure and user-friendly contact management application designed to streamline the storage, organization, and retrieval of contacts.
· **Designed** a RESTful backend using **Spring Boot** and **MySQL**.
· **Implemented** role-based access control and authentication using **Spring Security**.
· **Optimized** CRUD operations for contacts, reducing search time by **50%** and increasing database query efficiency.
· **Technologies Used**: Spring Boot, Spring Security, MySQL, Email Services, Thymleaf, Tailwind CSS.

Student Management Application

Symbiosis Skills and Professional University · github.com/shamita123d/Student_Management_System
· This Student Management System is built using Java, JDBC, and Swing, featuring a graphical user interface (GUI) for seamless management of student records.
· **Technologies Used:** Core Java, JDBC, Swing, MySQL.

EDUCATION

Bachelor of Technology

Priyadarshini J.L. College of Engineering · Nagpur · 2025 · 79.63% (7.96 cgpa)

HSC

Shri Pakwasa Gujrati Girl's Junior College · Nagpur · 2021 · 80.67%

SSC

Jawaharlal Darda Convent · Nagpur · 2021 · 72.83%

SKILLS

Programming Languages:C,C++,Javascript,Java(Core Java)

Front End : HTML ,CSS, JS,React,Angular

Frameworks & Libraries :Spring Framework ,Springboot

Databases :MySQL, Database Management Systems (DBMS)

Tools: Git, GitHub, Maven

Other Skills: REST API Development, Microservices, TailwindCSS, Data Structures & Algorithms, Problem-solving, OOP
